PROFESSIONAL SUMMARY

Platform Engineer with **1.4 years of production infrastructure experience** building developer-enabling, self-service cloud platforms. Promoted from Intern to full-time within 5 months. Designed **Terraform IaC** (34 reusable modules) for self-service multi-environment provisioning, implemented ArgoCD GitOps workflows for platform teams, and operated Kubernetes (EKS/OpenShift) clusters with Helm, Karpenter, and KEDA. Delivered 80% faster infrastructure provisioning, 95% configuration drift reduction, and 70% toil reduction through Python/Bash automation – core platform engineering outcomes.

TECHNICAL SKILLS

Scripting & OS: Python, Bash/Shell, Linux (Ubuntu, Amazon Linux, RHEL), System Administration
Cloud: AWS (EKS, EC2, Lambda, S3, ECR, RDS, VPC, CloudWatch, CodePipeline, App Runner), Azure (Fundamentals)
Containers & Orchestration: Kubernetes (EKS, OpenShift), Docker, Helm, Istio, Karpenter, KEDA, Ingress-NGINX
IaC: Terraform (34 reusable modules), AWS CloudFormation, AWS SAM, Ansible
CI/CD & GitOps: Jenkins, GitLab CI/CD, GitHub Actions, AWS CodePipeline, AWS CodeBuild, ArgoCD
Observability: Prometheus, Grafana, Loki, ELK Stack, Datadog, CloudWatch
Security & Secrets: HashiCorp Vault, AWS Secrets Manager, Sealed Secrets, Trivy, IAM, KMS, TLS/SSL
Version Control: Git, GitHub, Bitbucket, GitOps workflows

CORE COMPETENCIES

Terraform IaC – Self-Service Infrastructure

Kubernetes (EKS, OpenShift) | ArgoCD GitOps

Helm Chart Authoring | Platform Standardization

CI/CD Developer Enablement (Jenkins | GitHub Actions)

Python | Bash Automation (70% toil reduction)

AWS Cloud Infrastructure

Prometheus | Grafana | Observability

Linux Administration

IAM | Vault | Secrets Manager

Developer Experience Engineering

PROFESSIONAL EXPERIENCE

eSparkBiz Technologies

Jun 2025 – Apr 2026

DevOps Engineer | Ahmedabad, India

- Provisioned multi-environment AWS infrastructure on **Linux (Ubuntu, Amazon Linux, RHEL)** using **Terraform IaC** (34 reusable modules, S3 remote state, DynamoDB locking) – reducing provisioning time by **80%** and configuration drift by **95%** across Dev, Staging, and Production.
- Operated **Kubernetes (EKS, OpenShift)** clusters with ArgoCD GitOps, Helm, Istio service mesh, and Ingress-NGINX Controller – managing zero-downtime rollouts, Karpenter autoscaling, and KEDA event-driven scaling; sustained **99.9% uptime** across multi-AZ clusters.
- Developed **Python and Bash** automation eliminating **~70% of recurring operational toil** – covering cluster operations, log triage, secret rotation, and pipeline scripting; integrated SonarQube quality gates into CI/CD workflows.
- Designed and maintained **40+ CI/CD pipelines** (Jenkins, GitLab CI/CD, GitHub Actions, AWS CodePipeline, AWS CodeBuild) automating build-test-deploy workflows across **20+ Dockerised microservices** – cutting release cycles by **82% (45 min to under 8 min)** with zero manual intervention.
- Drove **root-cause analysis** for Linux-based production incidents (CPU, memory, network, container runtime); built observability stack with **Prometheus, Grafana, Loki, ELK Stack, and Datadog**; authored runbooks and post-incident reviews.

DevOps Engineer Intern | Ahmedabad, India

- Built and maintained **AWS infrastructure monitoring** on Linux environments – configured CloudWatch dashboards, triaged production incidents across Kubernetes workloads, and authored operational runbooks.
- Wrote **Python and Bash** automation scripts to streamline deployment workflows and reduce manual operational steps – demonstrated ownership and impact, earning **full-time promotion within 5 months**.

KEY PROJECTS

Cloud-Native SaaS CRM - Multi-Tenant AWS EKS Build & Deploy GitOps & IaC

Terraform | AWS EKS | Docker | Jenkins | GitLab CI/CD | GitHub Actions | AWS CodePipeline | ArgoCD | Ingress-NGINX | Prometheus | Grafana | Velero | Karpenter | KEDA

Built multi-environment CI/CD architecture with per-environment VPC isolation and S3/DynamoDB remote state – enabling reproducible Dev/Production infrastructure with zero-downtime EKS upgrades (v1.33 to v1.34). Reduced compute costs by **30% (\$500+/month)** via Karpenter Spot/On-Demand node diversification and KEDA off-hours scale-down. Implemented multi-region DR (Velero, S3/ECR cross-region replication, AWS Backup) achieving **RPO < 1 hour**.

Serverless Backend - Multi-Tenant Salon Management SaaS Production

AWS Lambda | SAM | CloudFormation | API Gateway | RDS PostgreSQL | Amazon EFS | Secrets Manager | Python

Architected serverless build/deploy system using **6 nested SAM/CloudFormation templates** with independent deployment of **30+ Python Lambda functions** with reproducible packaging and per-function least-privilege IAM. Engineered shared **EFS-mounted Python dependency layer** eliminating packaging bottlenecks and cutting build times by **60%+**.

Healthcare Management System - Cloud Infrastructure & CI/CD Production

AWS S3 | CloudFront | App Runner | ECR | GHCR | Docker | GitHub Actions | Secrets Manager | IAM

Engineered split-hosting (S3/CloudFront frontend, Dockerised App Runner backend) with **dual-registry GHCR/ECR strategy** enabling zero-downtime redeployments and **~30% reduced image pull latency** serving 500+ concurrent users. Automated full release workflow via GitHub Actions; applied least-privilege IAM scoping removing 5+ overly permissive roles.

EDUCATION

B.Tech, Information Technology – Dharmsinh Desai University, Gujarat

2021 – 2025

CGPA: 7.25 / 10
