PROFESSIONAL SUMMARY

Associate Cloud Engineer with **1+ year** architecting and operating **AWS infrastructure, CI/CD pipelines, and Linux-based cloud environments** — sustaining **99.9% uptime SLA**, cutting release cycles **82% (45 → 8 min)**, and reducing compute costs **30% (\$500+/month)**. Hands-on with **AWS (EC2, ECS, EKS, Lambda, S3, RDS, VPC, CloudFront, Route 53, CloudWatch)**, **Jenkins, GitLab CI/CD, GitHub Actions, Docker, Terraform, ELK Stack, PowerShell, Python/Bash** and 24x7 production support.

TECHNICAL SKILLS

Cloud Platforms & AWS Services: AWS — EC2, ECS, EKS, Lambda, S3, RDS, VPC, CloudFront, Route 53, CloudWatch, IAM, Elastic Beanstalk, ECR

CI/CD & Automation: Jenkins, GitLab CI/CD, GitHub Actions, AWS CodePipeline, AWS CodeBuild, ArgoCD, Git

Containers & Orchestration: Docker, Kubernetes (EKS), Helm, Karpenter, KEDA, Ingress-NGINX

Infrastructure as Code: Terraform (34 reusable modules), AWS CloudFormation, AWS SAM, S3 remote state, DynamoDB locking

Web Servers & OS: Linux (Ubuntu, Amazon Linux, RHEL), System Administration, Nginx, Apache

Scripting & Automation: Python, Bash/Shell, PowerShell, automation, log triage, secret rotation

Observability & Monitoring: Prometheus, Grafana, Loki, ELK Stack (Elasticsearch, Logstash, Kibana), CloudWatch

Security & Secrets: HashiCorp Vault, AWS Secrets Manager, Sealed Secrets, Trivy Operator, IAM least-privilege, KMS, TLS/SSL

PROFESSIONAL EXPERIENCE

Cloud Engineer | eSparkBiz · Ahmedabad, India

Jun 2025 – Apr 2026

- Architected and operated production AWS infrastructure spanning EC2, ECS, EKS, Lambda, S3, RDS, VPC, CloudFront, Route 53, and CloudWatch across multi-AZ deployments — supporting 20+ Dockerised microservices with 99.9% uptime and stable 24x7 production workloads.
- Designed and maintained 40+ CI/CD pipelines using Jenkins, GitLab CI/CD, GitHub Actions, AWS CodePipeline, and AWS CodeBuild — automating build-test-deploy workflows across 20+ Dockerised microservices, cutting release cycles by 82% (45 min → under 8 min).
- Provisioned multi-environment AWS infrastructure on Linux (Ubuntu, Amazon Linux, RHEL) using Terraform IaC (34 reusable modules, S3 remote state, DynamoDB locking) — reducing provisioning time by 80% and configuration drift by 95% across Dev, Staging, and Production environments.
- Drove root-cause analysis for Linux-based production incidents across CPU, memory, network, and container runtime; built observability with Prometheus, Grafana, Loki, ELK Stack, and CloudWatch; authored runbooks and post-incident reviews for 24x7 operational readiness.
- Developed Python, Bash, and PowerShell automation to eliminate ~70% of recurring operational toil — covering cluster operations, log triage, secret rotation, and pipeline scripting; integrated Git code-review workflows into CI/CD for continuous improvement.

Cloud Engineer Intern | eSparkBiz · Ahmedabad, India

Jan 2025 – May 2025

- Built and maintained AWS infrastructure monitoring on Linux-based environments, configured CloudWatch dashboards, and triaged production incidents across Kubernetes workloads; authored operational runbooks for recurring issue patterns and root-cause analyses.
- Wrote Python and Bash automation scripts to streamline deployment workflows and reduce manual operational steps — demonstrated ownership and impact, earning full-time promotion within 5 months.

KEY PROJECTS

Cloud-Native SaaS CRM Platform — Multi-Tenant AWS / EKS Build & Deploy Infrastructure

Terraform · AWS EKS · Docker · Jenkins · GitLab CI/CD · GitHub Actions · AWS CodePipeline · ArgoCD · Ingress-NGINX · Prometheus · Grafana

- Designed multi-environment build/deploy architecture with per-environment VPC isolation and S3/DynamoDB remote state — enabling reproducible Dev/Production infrastructure on Linux-based EKS nodes with Ingress-NGINX Controller; executed zero-downtime EKS cluster upgrade (v1.33 → v1.34) managing node group rollouts, add-on compatibility, and API deprecation remediation.
- Reduced compute costs by 30% (\$500+/month) via Karpenter Spot/On-Demand diversification and KEDA off-hours scale-down; migrated deprecated loki-stack to Loki + Grafana Alloy, eliminating deprecated chart dependencies and improving log pipeline reliability.
- Built multi-region disaster recovery strategy using Velero (with EBS snapshot Data Mover), S3/ECR cross-region replication, and AWS Backup with cross-region vaults — achieving RPO < 1 hour for production workloads.

Serverless Backend — Multi-Tenant Salon Management SaaS

AWS Lambda · SAM · CloudFormation · API Gateway · RDS PostgreSQL · Amazon EFS · Secrets Manager · Python

- Architected a serverless build/deploy system using 6 nested SAM/CloudFormation templates with SAM build pipelines — enabling independent deployment of 30+ Python Lambda functions with reproducible packaging and per-function least-privilege IAM.
- Solved Lambda layer size constraints by engineering a shared EFS-mounted Python dependency layer across 30+ functions — eliminating packaging bottlenecks and cutting build times by 60%+.

Healthcare Management System — Cloud Infrastructure & CI/CD

AWS S3 · CloudFront · App Runner · ECR · Docker · GitHub Actions · Secrets Manager · IAM

- Engineered split-hosting (S3/CloudFront frontend, Dockerised App Runner backend) with a dual-registry GHCR/ECR strategy — enabling zero-downtime redeployments and ~30% reduced image pull latency while serving 500+ concurrent users.
- Automated full release workflow via GitHub Actions — Docker build, ECR/GHCR dual-push, S3 sync, CloudFront invalidation, and App Runner deploy; applied least-privilege IAM scoping that removed 5+ overly permissive roles.

EDUCATION

B.Tech, Information Technology — Dharmsinh Desai University, Gujarat, India | CGPA: 7.25 / 10

2021 – 2025

ACHIEVEMENTS

- Awarded “Student of the Year” in Class 10 for outstanding academic performance and leadership contributions.
