PROFESSIONAL SUMMARY

DevOps Engineer with **1+ year** operating **Linux-based, cloud-native infrastructure on AWS/EKS** — cutting compute cost **30% (\$500+/month)**, sustaining **99.9% uptime** and **zero-downtime rollouts**, and eliminating **~70% of operational toil** across 20+ Dockerised microservices. Hands-on with **Terraform, ArgoCD, Jenkins, GitLab CI/CD, GitHub Actions, Docker, Kubernetes (EKS), Helm, Prometheus, Grafana, Loki, Python/Bash**.

TECHNICAL SKILLS

CI/CD & GitOps: Jenkins, GitLab CI/CD, GitHub Actions, AWS CodePipeline, AWS CodeBuild, ArgoCD

Containers & Orchestration: Docker, Kubernetes (EKS), Helm, Karpenter, KEDA, Ingress-NGINX

Observability & Monitoring: Prometheus, Grafana, Loki, Grafana Alloy, CloudWatch, X-Ray

Security & Compliance: Least-privilege IAM, HashiCorp Vault, AWS Secrets Manager, KMS, Sealed Secrets, Trivy (image scanning)

Infrastructure as Code: Terraform, AWS CloudFormation, AWS SAM, Ansible

Cloud Platforms: AWS — EKS, EC2, Lambda, S3, ECR, RDS, VPC, IAM, CloudWatch, EFS, DynamoDB

Scripting & OS: Python, Bash/Shell, Linux (Ubuntu, Amazon Linux, RHEL), System Administration

Version Control & Code Review: Git, GitHub, Bitbucket, Branching Strategies, Pre-commit Hooks

PROFESSIONAL EXPERIENCE

DevOps Engineer | eSparkBiz · Ahmedabad, India

Jun 2025 – Apr 2026

- Reduced AWS compute costs by **30% (\$500+/month)** through **Karpenter Spot/On-Demand diversification**, KEDA off-hours scale-down, and a non-prod scheduling **CronJob** — preserving production availability while improving cluster resource utilization.
- Built and maintained **40+ CI/CD pipelines** using **Jenkins, GitLab CI/CD, GitHub Actions, AWS CodePipeline, and AWS CodeBuild** — automating build-test-deploy across **20+ Dockerised microservices**, including pipelines for new services, sustaining fast, automated (~8-minute) deployments.
- Operated **Kubernetes (EKS)** clusters with **ArgoCD GitOps, Helm, and Ingress-NGINX** — managing zero-downtime rollouts, Karpenter node autoscaling, and KEDA event-driven scaling; executed a zero-downtime EKS upgrade (**v1.33 → v1.34**); sustained **99.9% uptime** across multi-AZ clusters.
- Maintained and extended multi-environment AWS infrastructure on **Linux (Ubuntu, Amazon Linux, RHEL)** using **Terraform IaC** (34 reusable modules, S3 remote state, DynamoDB locking) — delivering consistent, reproducible provisioning across Dev, Staging, and Production.
- Drove **root-cause analysis** for **Linux-based production incidents** across CPU, memory, network, and container runtime; built observability with **Prometheus, Grafana, and Loki**, authoring runbooks and post-incident reviews; hardened security with **least-privilege IAM**, Vault/Secrets Manager rotation, Sealed Secrets, and Trivy image scanning.

DevOps Engineer Intern | eSparkBiz · Ahmedabad, India

Jan 2025 – May 2025

- Built and maintained AWS infrastructure monitoring on **Linux-based environments**, configured CloudWatch dashboards, and triaged production incidents across Kubernetes workloads; authored operational runbooks for recurring issue patterns and root-cause analyses.
- Wrote **Python and Bash** automation scripts to streamline deployment workflows and reduce manual operational steps — demonstrated ownership and impact, earning **full-time promotion within 5 months**.

KEY PROJECTS

Cloud-Native SaaS CRM Platform — Multi-Tenant AWS / EKS Build & Deploy Infrastructure

Terraform · AWS EKS · Docker · Jenkins · GitLab CI/CD · GitHub Actions · AWS CodePipeline · ArgoCD · Ingress-NGINX · Prometheus · Grafana

- Reduced compute costs by **30% (\$500+/month)** via **Karpenter Spot/On-Demand diversification**, KEDA off-hours scale-down, and a **Kubernetes CronJob** scaling dev/non-prod down overnight; migrated deprecated loki-stack to **Loki + Grafana Alloy** for reliable log pipelines.
- Operated and extended a multi-environment build/deploy architecture with per-environment **VPC isolation and S3/DynamoDB remote state** — enabling reproducible Dev/Production infrastructure on Linux-based EKS nodes with **Ingress-NGINX Controller**; executed zero-downtime **EKS cluster upgrade (v1.33 → v1.34)** managing node group rollouts, add-on compatibility, and API deprecation remediation.
- Built multi-region **disaster recovery strategy** using Velero (with EBS snapshot Data Mover), S3/ECR cross-region replication, and AWS Backup with cross-region vaults — achieving **RPO < 1 hour** for production workloads.

Serverless Backend — Multi-Tenant Salon Management SaaS

AWS Lambda · SAM · CloudFormation · API Gateway · RDS PostgreSQL · Amazon EFS · Secrets Manager · Python

- Maintained and extended a serverless build/deploy system of **6 nested SAM/CloudFormation templates** and **30+ Python Lambda functions** — handling deployments, reproducible packaging, and per-function least-privilege IAM.
- Solved Lambda layer size constraints (exceeding 250MB) by engineering a shared **EFs-mounted Python dependency layer** across 30+ functions — eliminating packaging bottlenecks and cutting build times by **60%+**.

Healthcare Management System — Cloud Infrastructure & CI/CD

AWS S3 · CloudFront · App Runner · ECR · Docker · GitHub Actions · GHCR · Secrets Manager · IAM

- Co-built a split-hosting prototype (S3/CloudFront frontend, Dockerised App Runner backend) with a **dual-registry GHCR/ECR strategy** — demonstrating zero-downtime redeployment for client review.
- Built the release workflow via **GitHub Actions** — Docker build, ECR/GHCR dual-push, S3 sync, CloudFront invalidation, and App Runner deploy — with least-privilege IAM scoping.

EDUCATION

B.Tech, Information Technology — Dharmsinh Desai University, Gujarat, India | CGPA: 7.25 / 10

2021 – 2025

ACHIEVEMENTS

- Awarded **“Student of the Year”** in Class 10 for outstanding academic performance and leadership contributions.
