## PROFESSIONAL SUMMARY

DevOps Engineer with **1+ year** in **cloud infrastructure, CI/CD, and production support** across 20+ Dockerised microservices — sustaining **~8-minute automated deploys, 99.9% uptime**, and cutting operational toil **70%**. Hands-on with **AWS (EC2, EKS, IAM, VPC, CloudWatch)**, **Docker**, **Kubernetes**, **Jenkins**, **GitLab CI/CD**, **GitHub Actions**, **Terraform**, **Prometheus**, **Grafana**, **Datadog**, **ELK**, **Python/Bash**.

## TECHNICAL SKILLS

**Cloud Platforms:** AWS — EC2, EKS, Lambda, S3, ECR, RDS, VPC, IAM, CloudWatch, CloudFront

**Containers & Orchestration:** Docker, Kubernetes (EKS), Helm, Karpenter, KEDA, Ingress-NGINX

**CI/CD & GitOps:** GitHub Actions, GitLab CI/CD, Jenkins, AWS CodePipeline, AWS CodeBuild, ArgoCD

**Observability & Monitoring:** CloudWatch, Prometheus, Grafana, Loki, Grafana Alloy, Datadog, ELK Stack

**Infrastructure as Code:** Terraform, AWS CloudFormation, AWS SAM, Ansible

**Scripting & OS:** Python, Bash/Shell, Linux (Ubuntu, Amazon Linux, RHEL), System Administration

**Security & Secrets:** HashiCorp Vault, AWS Secrets Manager, Sealed Secrets, Trivy Operator, IAM, KMS, TLS/SSL

**Version Control & Code Review:** Git, GitHub, Bitbucket, Branching Strategies

## PROFESSIONAL EXPERIENCE

**DevOps Engineer** | eSparkBiz · Ahmedabad, India

Jun 2025 – Apr 2026

- Built and maintained **40+ CI/CD pipelines** using **GitHub Actions, GitLab CI/CD, Jenkins, AWS CodePipeline, and AWS CodeBuild** — automating build-test-deploy across **20+ Dockerised microservices**, including pipelines for new services, sustaining fast automated (**~8-minute**) deployments.
- Deployed and supported **containerized applications** on **Kubernetes (EKS)** with **ArgoCD GitOps, Helm, and Ingress-NGINX** — managing zero-downtime rollouts, Karpenter node autoscaling, and KEDA event-driven scaling; executed a zero-downtime **EKS upgrade (v1.33 → v1.34)**; sustained **99.9% uptime** across multi-AZ clusters.
- Managed and maintained multi-environment **AWS infrastructure** (EC2, EKS, VPC, IAM, S3, CloudWatch) on **Linux (Ubuntu, Amazon Linux, RHEL)** using **Terraform IaC** (34 reusable modules, S3 remote state, DynamoDB locking) — delivering reproducible provisioning across Dev, Staging, and Production.
- Monitored systems and analyzed logs with **Prometheus, Grafana, Loki, Datadog, and ELK Stack**; drove **root-cause analysis** for **Linux-based production incidents** across CPU, memory, network, and container runtime; authored runbooks and post-incident reviews.
- Automated operational tasks with **Python and Bash** to eliminate **~70% of recurring operational toil** — cluster operations, log triage, secret rotation, scheduled scaling, and pipeline scripting.

**DevOps Engineer Intern** | eSparkBiz · Ahmedabad, India

Jan 2025 – May 2025

- Built and maintained AWS infrastructure monitoring on **Linux-based environments**, configured CloudWatch dashboards, and triaged production incidents across Kubernetes workloads; authored operational runbooks for recurring issue patterns and root-cause analyses.
- Wrote **Python and Bash** automation scripts to streamline deployment workflows and reduce manual operational steps — demonstrated ownership and impact, earning **full-time promotion within 5 months**.

## KEY PROJECTS

**Cloud-Native SaaS CRM Platform — Multi-Tenant AWS / EKS Build & Deploy Infrastructure**

*Terraform · AWS EKS · Docker · Jenkins · GitLab CI/CD · GitHub Actions · AWS CodePipeline · ArgoCD · Ingress-NGINX · Prometheus · Grafana*

- Operated and extended a multi-environment build/deploy architecture with per-environment **VPC isolation and S3/DynamoDB remote state** — enabling reproducible Dev/Production infrastructure on Linux-based EKS nodes with **Ingress-NGINX Controller**; executed zero-downtime **EKS cluster upgrade (v1.33 → v1.34)** managing node group rollouts, add-on compatibility, and API deprecation remediation.
- Reduced compute costs by **30% (\$500+/month)** via Karpenter Spot/On-Demand diversification, KEDA off-hours scale-down, and a **Kubernetes CronJob** that scales dev/non-prod down overnight; migrated deprecated loki-stack to Loki + Grafana Alloy, improving log pipeline reliability.
- Built multi-region **disaster recovery strategy** using Velero (with EBS snapshot Data Mover), S3/ECR cross-region replication, and AWS Backup with cross-region vaults — achieving **RPO < 1 hour** for production workloads.

**Serverless Backend — Multi-Tenant Salon Management SaaS**

*AWS Lambda · SAM · CloudFormation · API Gateway · RDS PostgreSQL · Amazon EFS · Secrets Manager · Python*

- Maintained and extended a serverless build/deploy system of **6 nested SAM/CloudFormation templates** and **30+ Python Lambda functions** — handling deployments, reproducible packaging, and per-function least-privilege IAM.
- Solved Lambda layer size constraints (exceeding 250MB) by engineering a shared **EFS-mounted Python dependency layer** across 30+ functions — eliminating packaging bottlenecks and cutting build times by **60%+**.

**Healthcare Management System — Cloud Infrastructure & CI/CD (Prototype)**

*AWS S3 · CloudFront · App Runner · ECR · Docker · GitHub Actions · GHCR · Secrets Manager · IAM*

- Co-built a split-hosting prototype (S3/CloudFront frontend, Dockerised App Runner backend) with a **dual-registry GHCR/ECR strategy** — demonstrating zero-downtime redeployment for client review.
- Built the release workflow via **GitHub Actions** — Docker build, ECR/GHCR dual-push, S3 sync, CloudFront invalidation, and App Runner deploy — with least-privilege IAM scoping.

## EDUCATION

**B.Tech, Information Technology** — Dharmsinh Desai University, Gujarat, India | CGPA: 7.25 / 10

2021 – 2025

## ACHIEVEMENTS

- Awarded **“Student of the Year”** in Class 10 for outstanding academic performance and leadership contributions.
