PROFESSIONAL SUMMARY

DevOps / Cloud Engineer with **1+ year** building **scalable platform solutions, CI/CD systems, and proactive monitoring stacks** for cloud-native fintech infrastructure. Sustained **99.9% uptime SLAs**, eliminated **~70% operational toil**, and optimized release cycles across **20+ microservices** on **AWS EKS**. Hands-on with **Jenkins, ArgoCD, Terraform, Kubernetes, Python/Bash**, and **end-to-end platform ownership**.

TECHNICAL SKILLS

CI/CD & GitOps: Jenkins, GitLab CI/CD, GitHub Actions, AWS CodePipeline, AWS CodeBuild, ArgoCD, Git workflows, design/code reviews
Containers & Orchestration: Docker, Kubernetes (EKS, OpenShift), Helm, Karpenter, KEDA, Ingress-NGINX
Infrastructure as Code: Terraform (34 reusable modules, S3 remote state, DynamoDB locking), AWS CloudFormation, SAM
Cloud Platforms: AWS — EKS, EC2, Lambda, S3, ECR, RDS, VPC, CloudWatch; Azure (Fundamentals)
Observability & Monitoring: Prometheus, Grafana, Loki, Grafana Alloy, CloudWatch, proactive monitoring stack
Security & Secrets: HashiCorp Vault, AWS Secrets Manager, Sealed Secrets, Trivy Operator, IAM least-privilege, IRSA, Pod Identity
Scripting & OS: Python, Bash/Shell, Linux (Ubuntu, Amazon Linux, RHEL), System Administration
Networking & Architecture: VPC, multi-AZ deployments, multi-region DR, ingress controllers, load balancing

PROFESSIONAL EXPERIENCE

DevOps / Cloud Engineer | eSparkBiz · Ahmedabad, India

Jun 2025 – Apr 2026

- Sustained **99.9% production uptime availability** across multi-AZ Kubernetes environments by **refining the monitoring stack to be more proactive**, utilizing **Prometheus, Grafana, and Loki** to detect system degradations prior to customer impact.
- Worked with application squads to **optimize internal CI/CD systems**, eliminating **~70% of operational toil** through **Python/Bash automation** while actively participating in **design and code reviews** to guarantee platform delivery quality.
- Owned and maintained a secure, multi-environment **Infrastructure as Code (IaC) codebase** utilizing **34 reusable Terraform modules**, reducing manual ecosystem provisioning times by **80%** and eliminating configuration drift by **95%**.
- Drove **incident response** and **root-cause analysis** for **Linux-based production incidents** across CPU, memory, network, and container runtime; authored **blameless post-mortems and runbooks** that reduced repeat-incident frequency and accelerated on-call response readiness.
- Operated **Kubernetes (EKS, OpenShift)** clusters with **ArgoCD GitOps, Helm, and Ingress-NGINX Controller** — managing zero-downtime rollouts, **Karpenter Spot/On-Demand diversification**, and **KEDA event-driven scaling**; preserved availability while reducing compute costs by **30% (\$500+/month)**.

DevOps Engineer Intern | eSparkBiz · Ahmedabad, India

Jan 2025 – May 2025

- Built and maintained AWS infrastructure monitoring on **Linux-based environments**, configured CloudWatch dashboards, and triaged production incidents across Kubernetes workloads; authored operational runbooks for recurring issue patterns and root-cause analyses.
- Wrote **Python and Bash** automation scripts to streamline deployment workflows and reduce manual operational steps — demonstrated ownership and impact, earning **full-time promotion within 5 months**.

KEY PROJECTS

Cloud-Native SaaS CRM Platform — Multi-Tenant AWS / EKS Build & Deploy Infrastructure

Terraform · AWS EKS · Docker · Jenkins · GitLab CI/CD · GitHub Actions · AWS CodePipeline · ArgoCD · Ingress-NGINX · Prometheus · Grafana

- Designed multi-environment build/deploy architecture with per-environment **VPC isolation and S3/DynamoDB remote state** — enabling reproducible Dev/Production infrastructure on Linux-based EKS nodes with **Ingress-NGINX Controller 区分**; executed zero-downtime **EKS cluster upgrade (v1.33 → v1.34)** managing node group rollouts, add-on compatibility, and API deprecation remediation.
- Reduced compute costs by **30% (\$500+/month)** via Karpenter Spot/On-Demand diversification and KEDA off-hours scale-down; migrated deprecated loki-stack to Loki + Grafana Alloy, eliminating deprecated chart dependencies and improving log pipeline reliability.
- Built multi-region **disaster recovery strategy** using Velero (with EBS snapshot Data Mover), S3/ECR cross-region replication, and AWS Backup with cross-region vaults — achieving **RPO < 1 hour** for production workloads.

Serverless Backend — Multi-Tenant Salon Management SaaS

AWS Lambda · SAM · CloudFormation · API Gateway · RDS PostgreSQL · Amazon EFS · Secrets Manager · Python

- Architected a serverless build/deploy system using **6 nested SAM/CloudFormation templates** with SAM build pipelines — enabling independent deployment of **30+ Python Lambda functions** with reproducible packaging and per-function least-privilege IAM.
- Solved Lambda layer size constraints by engineering a shared **EFS-mounted Python dependency layer** across 30+ functions — eliminating packaging bottlenecks and cutting build times by **60%+**.

Healthcare Management System — Cloud Infrastructure & CI/CD

AWS S3 · CloudFront · App Runner · ECR · Docker · GitHub Actions · Secrets Manager · IAM

- Engineered split-hosting (S3/CloudFront frontend, Dockerised App Runner backend) with a **dual-registry GHCR/ECR strategy** — enabling zero-downtime redeployments and **~30% reduced image pull latency** while serving 500+ concurrent users.
- Automated full release workflow via **GitHub Actions** — Docker build, ECR/GHCR dual-push, S3 sync, CloudFront invalidation, and App Runner deploy; applied least-privilege IAM scoping that removed 5+ overly permissive roles.

EDUCATION

B.Tech, Information Technology — Dharmsinh Desai University, Gujarat, India | CGPA: 7.25 / 10

2021 – 2025

ACHIEVEMENTS

- Awarded **“Student of the Year”** in Class 10 for outstanding academic performance and leadership contributions.
