PROFESSIONAL SUMMARY

Site Reliability Engineer with **1+ year** sustaining **99.9% uptime SLA** for **Linux-based EKS clusters** serving 20+ microservices — driving incident response, eliminating **~70% operational toil**, and authoring runbooks that accelerate on-call readiness. Hands-on with **Prometheus, Grafana, Loki, Terraform, Kubernetes, Python/Bash, and AWS infrastructure**.

TECHNICAL SKILLS

Observability & Reliability: Prometheus, Grafana, Loki, Grafana Alloy, CloudWatch, SLO monitoring, runbooks, post-incident reviews
Containers & Orchestration: Kubernetes (EKS, OpenShift), Helm, ArgoCD, Karpenter, KEDA, Ingress-NGINX, Docker
SRE & Incident Response: Linux (Ubuntu, Amazon Linux, RHEL), root-cause analysis, on-call readiness, blameless post-mortems
Infrastructure as Code: Terraform (34 reusable modules, S3 remote state, DynamoDB locking), AWS CloudFormation, AWS SAM
CI/CD & Automation: Jenkins, GitLab CI/CD, GitHub Actions, AWS CodePipeline, AWS CodeBuild, Python, Bash/Shell
Cloud Platforms: AWS — EKS, EC2, Lambda, S3, ECR, RDS, VPC, CloudWatch; Azure (Fundamentals)
Security & Secrets: HashiCorp Vault, AWS Secrets Manager, Sealed Secrets, Trivy Operator, IAM least-privilege, KMS
Version Control & Collaboration: Git, GitHub, Bitbucket, Git/Gerrit code-review workflows

PROFESSIONAL EXPERIENCE

DevOps Engineer | eSparkBiz · Ahmedabad, India

Jun 2025 – Apr 2026

- Sustained **99.9% uptime SLA** for **Kubernetes (EKS, OpenShift)** clusters serving **20+ Dockerised microservices** across multi-AZ deployments — driving continuous SLO monitoring, proactive alerting, and capacity planning to meet reliability targets.
- Drove **incident response** and **root-cause analysis** for Linux-based production incidents across CPU, memory, network, and container runtime; authored **blameless post-mortems** and **runbooks** that reduced repeat-incident frequency and accelerated on-call response readiness.
- Operated **Kubernetes (EKS, OpenShift)** clusters with **ArgoCD GitOps, Helm, and Ingress-NGINX Controller** — managing zero-downtime rollouts, Karpenter node autoscaling, and KEDA event-driven scaling; executed zero-downtime **EKS cluster upgrade (v1.33 → v1.34)**.
- Provisioned multi-environment AWS infrastructure on **Linux (Ubuntu, Amazon Linux, RHEL)** using **Terraform IaC** (34 reusable modules, S3 remote state, DynamoDB locking) — reducing provisioning time by **80%** and configuration drift by **95%** across Dev, Staging, and Production environments.
- Eliminated **~70% of recurring operational toil** by developing **Python and Bash** automation covering cluster operations, log triage, secret rotation, and pipeline scripting — freeing engineering time for higher-value reliability work.

DevOps Engineer Intern | eSparkBiz · Ahmedabad, India

Jan 2025 – May 2025

- Built and maintained AWS infrastructure monitoring on **Linux-based environments**, configured CloudWatch dashboards, and triaged production incidents across Kubernetes workloads; authored operational runbooks for recurring issue patterns and root-cause analyses.
- Wrote **Python and Bash** automation scripts to streamline deployment workflows and reduce manual operational steps — demonstrated ownership and impact, earning **full-time promotion within 5 months**.

KEY PROJECTS

Cloud-Native SaaS CRM Platform — Multi-Tenant AWS / EKS Build & Deploy Infrastructure

Terraform · AWS EKS · Docker · Jenkins · GitLab CI/CD · GitHub Actions · AWS CodePipeline1A7A7A · ArgoCD · Ingress1A7A7A · Prometheus · Grafana

- Sustained **99.9% uptime SLA** across multi-AZ EKS clusters with **Prometheus, Grafana, and Loki** observability stack; migrated deprecated loki-stack to Loki + Grafana Alloy, eliminating deprecated chart dependencies and improving log pipeline reliability.
- Reduced compute costs by **30% (\$500+/month)** via Karpenter Spot/On-Demand diversification and KEDA off-hours scale-down — preserving production availability while improving cluster resource utilization.
- Built multi-region **disaster recovery strategy** using Velero (with EBS snapshot Data Mover), S3/ECR cross-region replication, and AWS Backup with cross-region vaults — achieving **RPO < 1 hour** for production workloads.

Serverless Backend — Multi-Tenant Salon Management SaaS

AWS Lambda · SAM · CloudFormation · API Gateway · RDS PostgreSQL · Amazon EFS · Secrets Manager · Python

- Architected a serverless build/deploy system using **6 nested SAM/CloudFormation templates** with SAM build pipelines — enabling independent deployment of **30+ Python Lambda functions** with reproducible packaging and per-function least-privilege IAM.
- Solved Lambda layer size constraints by engineering a shared **EFS-mounted Python dependency layer** across 30+ functions — eliminating packaging bottlenecks and cutting build times by **60%+**.

Healthcare Management System — Cloud Infrastructure & CI/CD

AWS S3 · CloudFront · App Runner · ECR · Docker · GitHub Actions · Secrets Manager · IAM

- Engineered split-hosting (S3/CloudFront frontend, Dockerised App Runner backend) with a **dual-registry GHCR/ECR strategy** — enabling zero-downtime redeployments and **~30% reduced image pull latency** while serving 500+ concurrent users.
- Automated full release workflow via **GitHub Actions** — Docker build, ECR/GHCR dual-push, S3 sync, CloudFront invalidation, and App Runner deploy; applied least-privilege IAM scoping that removed 5+ overly permissive roles.

EDUCATION

B.Tech, Information Technology — Dharmsinh Desai University, Gujarat, India | CGPA: 7.25 / 10

2021 – 2025

ACHIEVEMENTS

- Awarded **“Student of the Year”** in Class 10 for outstanding academic performance and leadership contributions.
