PROFESSIONAL SUMMARY

AWS Cloud / DevOps Engineer with **1+ year** designing **scalable, highly available AWS infrastructure** — 20+ Dockerised microservices on multi-AZ EKS, 30+ serverless Lambda functions, **99.9% uptime**; reduced compute costs **30% (\$500+/month)** and provisioning **80%** via Terraform IaC. Deep hands-on with **EC2, EKS, Lambda, S3, RDS, VPC, IAM, KMS, CloudWatch, CloudFormation, SAM, Terraform, Docker, Python/Bash; Azure (Fundamentals)**.

TECHNICAL SKILLS

AWS Compute & Containers: EC2, EKS, ECS, Lambda, Fargate, ECR, App Runner

AWS Networking & DNS: VPC, Subnets, Security Groups, Route 53, ELB/ALB, CloudFront, NAT Gateway

AWS Storage & Database: S3, EFS, RDS, Aurora PostgreSQL, DynamoDB

AWS Security & Operations: IAM (IRSA, Pod Identity), KMS, Secrets Manager, ACM, CloudWatch, X-Ray, CloudTrail, AWS Backup

Infrastructure as Code: Terraform, AWS CloudFormation, AWS SAM, AWS CDK, Ansible

Containers & CI/CD: Docker, Kubernetes (EKS), Helm, ArgoCD, Jenkins, GitLab CI/CD, GitHub Actions, AWS CodePipeline

Observability & Multi-Cloud: Prometheus, Grafana, Loki, ELK Stack, Datadog; Azure (Fundamentals)

Scripting & OS: Python, Bash/Shell, Linux (Ubuntu, Amazon Linux, RHEL), System Administration

PROFESSIONAL EXPERIENCE

DevOps Engineer | eSparkBiz · Ahmedabad, India

Jun 2025 – Apr 2026

- Architected and operated production AWS infrastructure spanning **EC2, EKS, Lambda, S3, RDS, VPC, IAM, and CloudWatch** across multi-AZ deployments — supporting **20+ Dockerised microservices** with **99.9% uptime** through zero-downtime ArgoCD GitOps rollouts, Karpenter autoscaling, and KEDA event-driven scaling.
- Provisioned reproducible multi-environment AWS infrastructure on **Linux (Ubuntu, Amazon Linux, RHEL)** using **Terraform IaC** (34 reusable modules, S3 remote state, DynamoDB locking) — reducing provisioning time **80%** and configuration drift **95%** across Dev, Staging, and Production environments.
- Reduced AWS compute costs by **30% (\$500+/month)** through **Karpenter Spot/On-Demand diversification, KEDA off-hours scale-down, and right-sized cluster capacity** — preserving production availability while improving cluster resource utilization across 20+ services.
- Designed **40+ CI/CD pipelines** using **AWS CodePipeline, AWS CodeBuild, Jenkins, GitLab CI/CD, and GitHub Actions** — automating build-test-deploy workflows across 20+ Dockerised microservices, cutting release cycles by **82% (45 → 8 min)** with zero manual intervention.
- Hardened cloud security with **IAM least-privilege policies (IRSA, Pod Identity), KMS encryption at rest, AWS Secrets Manager and HashiCorp Vault** for centralized secret management, **Sealed Secrets** for GitOps-compatible K8s secrets, and **Trivy Operator** for continuous container vulnerability scanning.

DevOps Engineer Intern | eSparkBiz · Ahmedabad, India

Jan 2025 – May 2025

- Built and maintained **AWS infrastructure monitoring** on **Linux-based environments**, configured CloudWatch dashboards, and triaged production incidents across Kubernetes workloads; authored operational runbooks for recurring issue patterns and root-cause analyses.
- Wrote **Python and Bash** automation scripts to streamline deployment workflows and reduce manual operational steps — demonstrated ownership and impact, earning **full-time promotion within 5 months**.

KEY PROJECTS

Cloud-Native SaaS CRM Platform — Multi-Tenant AWS / EKS Build & Deploy Infrastructure

Terraform · AWS EKS · Docker · Jenkins · GitLab CI/CD · GitHub Actions · AWS CodePipeline · ArgoCD · Ingress-NGINX · Prometheus · Grafana

- Designed multi-environment AWS architecture with per-environment **VPC isolation, S3/DynamoDB remote state, and Ingress-NGINX Controller** on Linux-based EKS nodes; executed zero-downtime **EKS cluster upgrade (v1.33 → v1.34)** managing node group rollouts, add-on compatibility, and API deprecation remediation.
- Reduced compute costs by **30% (\$500+/month)** via Karpenter Spot/On-Demand diversification and KEDA off-hours scale-down; migrated deprecated loki-stack to Loki + Grafana Alloy, eliminating chart dependency drift and improving log pipeline reliability.
- Built multi-region **disaster recovery strategy** using Velero (with EBS snapshot Data Mover), S3/ECR cross-region replication, and AWS Backup with cross-region vaults — achieving **RPO < 1 hour** for production workloads.

Serverless Backend — Multi-Tenant Salon Management SaaS

AWS Lambda · SAM · CloudFormation · API Gateway · RDS PostgreSQL · Amazon EFS · Secrets Manager · Python

- Architected a serverless build/deploy system using **6 nested SAM/CloudFormation templates** with SAM build pipelines — enabling independent deployment of **30+ Python Lambda functions** with reproducible packaging and per-function least-privilege IAM.
- Solved Lambda layer size constraints by engineering a shared **EFs-mounted Python dependency layer** across 30+ functions — eliminating packaging bottlenecks and cutting build times by **60%+**.

Healthcare Management System — Cloud Infrastructure & CI/CD

AWS S3 · CloudFront · App Runner · ECR · Docker · GitHub Actions · Secrets Manager · IAM

- Engineered split-hosting (S3/CloudFront frontend, Dockerised App Runner backend) with a **dual-registry GHCR/ECR strategy** — enabling zero-downtime redeployments and **~30% reduced image pull latency** while serving 500+ concurrent users.
- Automated full release workflow via **GitHub Actions** — Docker build, ECR/GHCR dual-push, S3 sync, CloudFront invalidation, and App Runner deploy; applied least-privilege IAM scoping that removed 5+ overly permissive roles.

EDUCATION

B.Tech, Information Technology — Dharmsinh Desai University, Gujarat, India | CGPA: 7.25 / 10

2021 – 2025

ACHIEVEMENTS

- Awarded **“Student of the Year”** in Class 10 for outstanding academic performance and leadership contributions.
