PROFESSIONAL SUMMARY

DevOps Engineer with 1+ year designing and operating production AWS infrastructure, Kubernetes (EKS), and CI/CD pipelines across 3 end-to-end cloud projects — cutting provisioning time by 80%, compute costs by \$500+/month, and sustaining 99.9% uptime across 20+ microservices. Hands-on expertise in Terraform IaC, ArgoCD GitOps, Docker, Prometheus/Grafana/Loki observability, and Python/Bash automation on Linux.

TECHNICAL SKILLS

Cloud Platforms: AWS — EKS, EC2, Lambda, S3, ECR, VPC, Route 53, ELB/ALB, CloudFront, Secrets Manager

Infrastructure as Code: Terraform, AWS CloudFormation, AWS SAM, Ansible

CI/CD & GitOps: GitHub Actions, AWS CodeBuild, Jenkins, GitLab CI, ArgoCD, SonarQube

Containers & Orchestration: Docker, Kubernetes (EKS), Helm, Karpenter, KEDA

Monitoring & Observability: Prometheus, Grafana, Loki, Grafana Alloy, CloudWatch

Web Servers: Apache HTTP Server, Nginx

Security & Networking: IAM, RBAC, KMS, Sealed Secrets; TLS/SSL, DNS, Load Balancers, VPC isolation

Scripting & OS: Python, Bash/Shell, Linux (Ubuntu, Amazon Linux)

Version Control & Databases: Git, GitHub; PostgreSQL (Aurora, RDS), MySQL

PROFESSIONAL EXPERIENCE

DevOps Engineer | Jun 2025 – Present

eSparkBiz · Ahmedabad, Gujarat, India

- Designed and maintained CI/CD pipelines using GitHub Actions and AWS CodeBuild — automating build-test-deploy workflows across 20+ Dockerised microservices, cutting release cycles by 82% and enabling multi-daily deployments with zero manual intervention.
- Provisioned multi-environment AWS infrastructure using Terraform IaC (34 reusable modules, S3 remote state, DynamoDB locking) — reducing provisioning time by 80% and configuration drift by 95% across Dev, Staging, and Production environments.
- Operated Kubernetes (EKS) clusters using ArgoCD GitOps and Helm — managing zero-downtime rollouts, Karpenter node autoscaling, and KEDA event-driven scaling; sustained 99.9% uptime across multi-AZ clusters with Prometheus, Grafana, and Loki observability.
- Developed Python and Bash automation tools to eliminate ~70% of recurring manual operational toil — covering cluster operations, log triage, secret rotation, and monitoring; integrated SonarQube quality gates into all CI/CD pipelines.

DevOps Engineer Intern | Jan 2025 – May 2025

eSparkBiz · Ahmedabad, Gujarat, India

- Built and maintained AWS infrastructure monitoring, configured CloudWatch dashboards, and triaged production incidents across Linux and Kubernetes environments; authored operational runbooks for recurring issue patterns.
- Wrote Python and Bash automation scripts to streamline deployment workflows and reduce manual operational steps — demonstrated ownership and impact, earning full-time promotion within 5 months.

KEY PROJECTS

Cloud-Native SaaS CRM Platform — Multi-Tenant AWS / EKS Infrastructure

Terraform · AWS EKS · Docker · ArgoCD · AWS CodeBuild · Karpenter · KEDA · Prometheus · Grafana · Loki · Aurora PostgreSQL

- Designed multi-tenant architecture with per-environment VPC isolation, S3/DynamoDB remote state, and 34 reusable Terraform modules — enabling isolated Dev/Production environments from a single IaC framework; executed zero-downtime EKS cluster upgrade (v1.33 → v1.34) managing node group rollouts, add-on compatibility, and API deprecation remediation across 20+ microservices.
- Reduced compute costs by 30% (\$500+/month) via Karpenter Spot/On-Demand diversification and KEDA off-hours scale-down; migrated deprecated loki-stack to Loki + Grafana Alloy, eliminating deprecated chart dependencies and improving log pipeline reliability.

Serverless Backend — Multi-Tenant Salon Management SaaS

AWS Lambda · SAM · CloudFormation · API Gateway · RDS PostgreSQL · Amazon EFS · Secrets Manager · Python

- Choose a fully serverless architecture using 6 nested SAM/CloudFormation templates — allowing independent deployment of 30+ Lambda functions, API Gateway, and RDS PostgreSQL while enforcing per-function least-privilege IAM boundaries.
- Solved Lambda layer size constraints by engineering a shared EFS-mounted Python dependency layer across 30+ functions — eliminating packaging bottlenecks and cutting build times by 60%+.

Healthcare Management System — Cloud Infrastructure & CI/CD

AWS S3 · CloudFront · App Runner · ECR · Docker · GitHub Actions · Secrets Manager · IAM

- Architected a split-hosting model — S3/CloudFront for static frontend, Dockerised App Runner for backend — with a dual-registry GHCR/ECR strategy enabling zero-downtime redeployments and high-availability serving at scale.
- Automated the full release workflow via GitHub Actions — S3 sync, CloudFront invalidation, and App Runner deploy — eliminating all manual release steps and enabling consistent, repeatable deployments.

EDUCATION

B.Tech, Information Technology — Dharmsinh Desai University, Gujarat, India | CGPA: 7.25

2021 – 2025

ACHIEVEMENTS

- Awarded “**Student of the Year**” for outstanding academic performance and leadership contributions.
